

INTRODUCING THE NEW CUSTOM VDOO ORTHOTIC

A New Solution for Knee OA

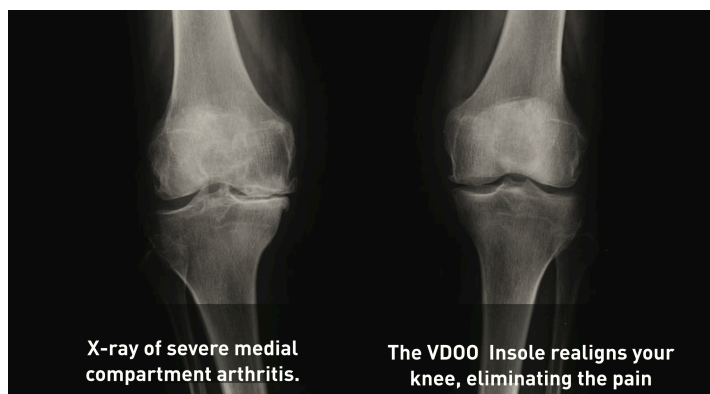

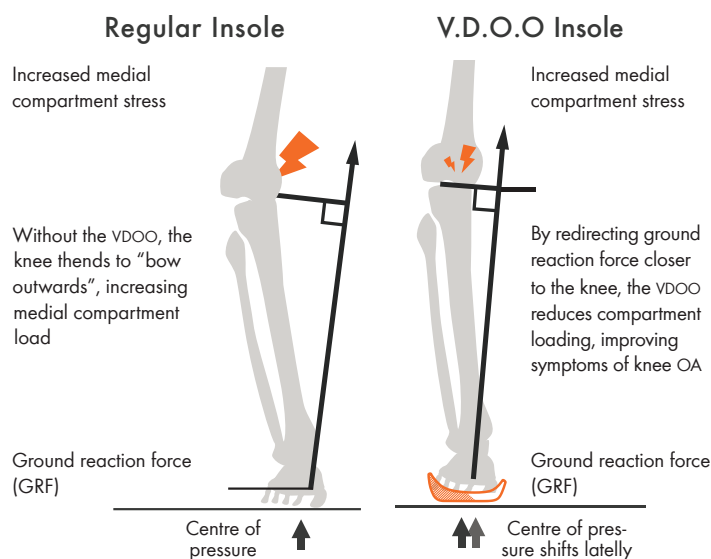

Get the unloading benefits of a knee brace with the comfort and convenience of an insole. The new Custom VDOO is the only orthotic designed and University tested to reduce knee Joint Loads... And Also Supports The Foot.

How does it work?

The custom VDOO insole relieves pain through a patent-pending shell design that reorients the load by shifting pressure under the foot.

How does it help?

X-ray of severe medial compartment arthritis.

The VDOO Insole realigns your knee, eliminating the pain

Backed by science

The unloading effect of the technology used in the custom VDOO has been tested in multiple university studies and has been published in the scientific journals, "Gait and Posture" and "Journal of Foot and Ankle Research". ^{1, 2}
